

## **End Range of Motion Improvement (ERMI), Inc. Joins Forces with Cypress Care**

Monday, September 2, 2008 2:30 EST

September 29, 2008 Atlanta, Georgia. ERMI, Inc., the leader in mechanical therapy for post-operative motion loss, has signed a contract with Cypress Care, a leader in the worker's compensation industry.

Effective immediately all patients falling under Cypress Care's plans will be granted access to ERMI's mechanical therapy devices when motion loss is diagnosed and mechanical therapy required for restoring joint motion.

ERMI, Inc. was founded in 1990 with the goal of developing non-surgical treatment alternatives for patients suffering from post-operative motion loss.

Today ERMI, Inc.'s devices have been used to treat over 20,000 patients, and now include mechanical therapy devices for the knee, ankle, elbow, shoulder and great toe.

**Cypress Care** is committed to delivering end-to-end health cost management solutions and integrated strategies that thoughtfully address the needs of the clients.

In 2001, Cypress Care entered the workers' compensation industry with a vision of revolutionizing the way pharmacy cost management was addressed through outcome-focused, customer-driven strategies and the functional application of innovative technology. Today, Cypress Care has expanded its products and services to other markets by applying expertise and best practices, which position Cypress Care as a thought leader in the workers' compensation and auto insurance industries.

Cypress Care is a fusion of creative ideas and powerful technology; unique culture and traditional ethics; forward-thinking pioneers and industry renowned experts – all focused on a single goal: To help the clients achieve the best financial and clinical outcomes and to help people get back to work and back to life.
